Hello!, how are u?, I'm writing this letter as a thank you.

I know that is not even a thousandth of what you deserve for giving me so many opportunities in my life, for covering me with success and motivating me more every day, because I know this type of support does not have everyone, and I am blessed that I have been for running into people as kind as you.

I'm happy that I was able to finish the preparatory music technician, where you also with me, who helped me to get a better instrument, proud to have been able to finish Cambridge that were completely sponsored by you, has won 3 tournaments in just this year in volleyball, where you have also been, because you have supported me since the first, time, and my fundamental studies, where I finished my high school, and this is also a part of the reason of this letter.

The reason is that I have decided to take a gap year, and it isn't for reasons to take a break, my reasons are because I had the idea for entering a private university in dentistry, the UK, when time passed, there began to be many situations that I really didn't like about the university, testimonies of people who dropped out due to their unorganized schedules, and postponement of years of study, which should be emphasized that there are not cheap, plus my career →

alone consists of a lot of expensive materials.

In addition to these comments, I went to talk with professionals in this field and they shared experiences about their assistants, they had gone through similar things with the UR, and they commented that UABC was a good option, the quality of studies was very good and that the prestige was high. I had discarded that option because it wanted me to study here, because of problems like those I decided not to file, but now I know it was a mistake and I should have had a 2nd option.

My decision is that I'll submit papers to call for the beginning of the following year at UABC, and this time I want to enter a dental office and be able to study as much as I can the career that I want; I want to know more about this and I know that this is how it would not be a lost year for me, and I also want to continue focusing on the orchestra and have new learning projects.

I hope you understand this situation that I have had, and that it falls on me, but I assure you that I'll continue to learn more and stand out as I've always tried, if it is not too much to ask, I'd like to continue with you by joining the university and let you know that I'll carry out all my effort.

Karla.

Editor's note: Karla went to Cambridge, the English School, for 18 months and spoke no English when she started.

Hello. How are you? (Translation by Perla)

In this letter I want to share about myself. 4 weeks ago I was given a robotics course by the school and I discovered that I am very good at building things, I learned to build circuits with paper and it has been very interesting for me.

I still don't know what to study but I could be an architect. I also discovered that I am very fast running and I have attended several competitions. It would be all for the moment, thank you for your attention.

Hello! I'm Bethel Arellano, a 7th semester engineering student in business management. I am really in love with my career, it brings me a variety of knowledge such as marketing, finance, industrial production, quality, etc. This semester the university gave me the opportunity to enter to practice a company, supervising an entire area. It is at Augen Opticos, which is a company where we make glasses, my job is to attend to the orders sent

to me from a laboratory in San Diego (Eyehub) Nothing of this would be possible without the bsf foundation, which provides great support to all students to continue studying without stressing or thinking about tuition payment, school supplies and transportation. Telling more about me, one of my hobbies is folk dance, an activity that I have been practicing for almost 13 years, but 3 years ago I joined a group in which now I am very happy. I have had local presentations such as Tijuana, Rosarito, Ensenada, Tecate and Mexicali; national presentations in Guadalajara and Tlaxcala, soon in Mexico City as well; and in July I also had the opportunity to dance

in Los Angeles, in "la vaquereada". Dancing is something that makes our hearts happy, that keeps us alive. It is worth mentioning that I really like teaching, giving classes, so in free time I help some children with subjects that bring them

difficulty; I also really like digital design, and 2 years ago I started a small marketing business, where I design logos, flyers, business cards and corporate stationery for some businesses. I only can say thanks to all the sponsors of the foundation for everything they do to help us, to help us achieve great dreams and goals.

My name is Jesus Arturo Garcia Hernandez, I am currently studying Law, my main goal in life is to be a family judge, if it's possible, one day I want to have a house with a huge garden so I can have some pets.

My hobbies are reading, watch anime and watch documentaries. I like to read from legal codes to novels. The subject of Family law fascinates me but I also like the civil law, one of the reasons that I became interested in law was because of my like for argued debates. One of my high school teachers, from my Logic subject, told me that argued debates were used a lot in law, now I know that this is only a very small part of the law subject, but even so it is my favorite part of it. The reason why I prefer the familiar subject over the rest is because I feel that it is the most important subject, this because of the high impact it generates compared to the other areas of law, and I firmly believe that as it is something that has an impact on the future of people in such a drastic way, it is necessary that the people who dedicates to work on it are empathic people whom do not give in so easily to pity or corruption, that is why, even if my contribution is little, I want to be able to be an appropriate judge one day.

I am very grateful to the BSF for the opportunity they gave me to continue with my university studies, the time we have spent together has been very valuable to me, I have met very wonderful and kind persons. In the time that I have been part of BSF I have seen the impact that they have on the lives of many other students by giving them the opportunity to have studies and become professionals with the chance to have a better life, it has motivated me a lot to work harder and be a better person.

I really appreciate BSF and want to thank to them for all the support they gave us, not only me or my family, but all of us. Thank you.

(Editor's Note: A glitch at UABC is going to delay Johann's graduation to June 2023 instead of December 2022.)

Good morning Judie. Thank you very much for all the support you give me, as with Rosemary, I was very sorry to mention it to you because I did not want to disappoint you; I did everything to achieve my goal, and because of a mistake, I failed. But seriously thank you very much for always supporting me.

The same, as I showed Rosemary, I tell you; in the final knowledge exam I did quite well, that helped me a little to not be more sad, but still, What I really appreciate is your support. Thank you so much, I love you

Diana
